

2S370-40/400 Submersible Solar Pump Package

2 x 200W PANEL PACKAGE

2 x 200W monocrystalline panels | Pump, motor, and
40m power cable | Control box | Spare helical rotor |
10m & 40m sensors | 2 x 2m MC4 cables

**Our smallest and most compact
solar submersible helical rotor
pump capable of delivering strong
flow from a small bore hole.**

- Capable of delivering strong volume from a small bore hole
- Easy D.I.Y. installation
- Lifts up to 90 metres
- 2-year warranty
- Lifetime customer service

Pump Performance

Head (m)	10	20	30	40	50	60	70	80	90
L/min	35	31	27	26	25	21	18	14	10

SPECIFICATIONS

Type	Helical Screw
Power	370W / 36V-DC
Diameter	2 inches
Max head	90m
Max flow	2,100 L/hr
Outlet	1/2 inch

FEATURES

Advanced 3-phase brushless stainless steel DC motor
Adjustable pump speed and timer for auto shut off/restart via sensors
High quality Japanese bearings (NSK)
Soft start and Maximum Power Point Tracking (MPPT)
Control of tank and bore water levels via sensors
Stainless Steel 304/316 for all exterior and outlet components
Stainless Steel 630 magnetic shaft for exceptional motor durability

ACCESSORIES – Get more out of your pump with these add-ons

Bore caps

Seals the bore hole and provides protection against weather, debris, and damage.

Pressure Switch

Used with a float valve to automatically switch the pump off when tank is full.

Converters

Allows connection to a 240V generator or mains power so you can pump water in all conditions.

Dam Floats

Fit for dams and wells to allow the pump to float and pump water effectively.
